LINEW-001T

"Line W" is a white to white blended yarn between linen and polyester fiber. The composition is 90% polyester, and 10% linen. The linen part is where the effect is. Linen from our "Line W" spread evenly in straight line shape which gives fabric trendy look. Adding linen brings natural and classic feeling to the fabric and also to the end customers.

Line W comes in "white to white" form which gives many benefits to customers. Some benefits are

- Quick response to color trend.
- Easy to manage stock and leftover yarn
- High flexibility in production.
- Reduce cost by using "feeder by feeder" knitting method or stripe knitting
