"FANCY & SPECIALTY YARN"

[RESEARCH & DEVELOPMENT]

The objective of our R&D is to better serve customer need and match with fast changing fashion trend. In order to launch new product constantly, Kongkiat dedicates R&D facility from our spinning mill and our dyeing facility. With these two facilities, we can create a very complex technique that embedded into most of our fancy yarns. Customers can also send us their samples to develop the similar look of the effect yarn and also the blending yarn ratio.

In order to serve fast fashion market, we are able to develop new yarn from R&D stage to commercial stage within a short period of time.

WHITE TO COLOR FANCY YARN

DESCRIPTION

"White background to colored effect fancy yarn" is a yarn made from two or three different raw white fibers and dyed fiber blending during the spinning process. It has raw white background part and colored effect part. This yarn can be knitted into fabric and then washed, bleached or overdyed the background part.

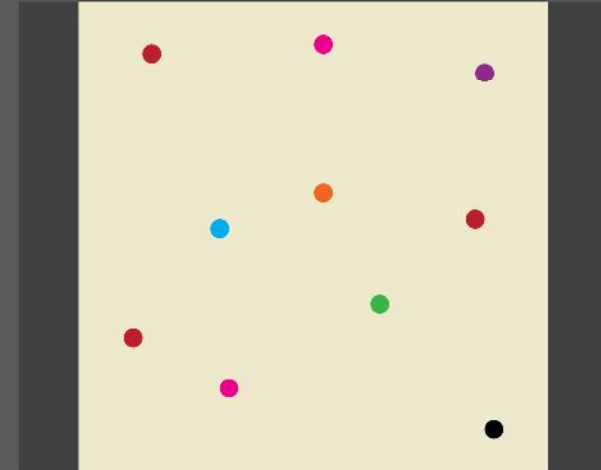

BENEFITS

- Semi-flexible in color selection
- Simple to use, only wash or bleach the fabric
- Overdyed on background part to create more variety
- Multicolor effect

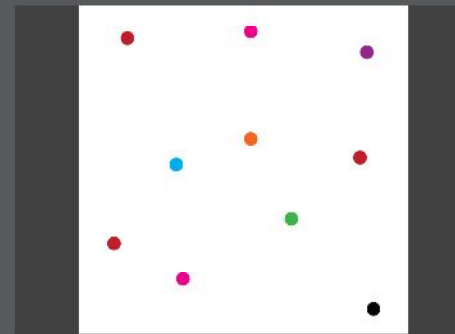

DISADVANTAGE

- Leftover and stock yarn; costly and difficult in material planning
- Not flexible enough to deal with fast changing in color and trend

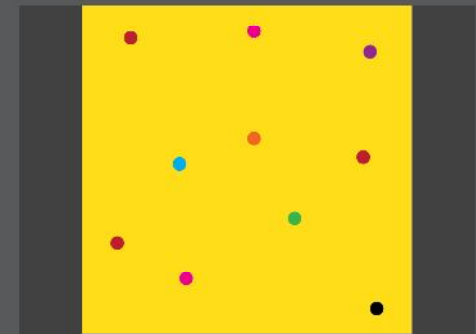

GREIGE or WASHED

fabric dyeing (piece dyeing)

bleached

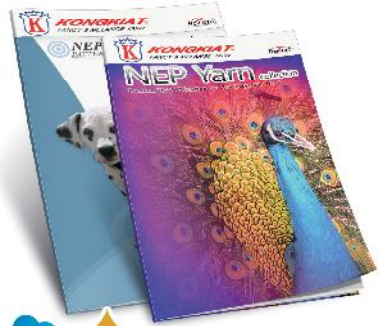

dyed on
background

WHITE TO COLOR FANCY YARN

SYMBOL  cotton  polyester  rayon

WHITE TO WHITE FANCY YARN

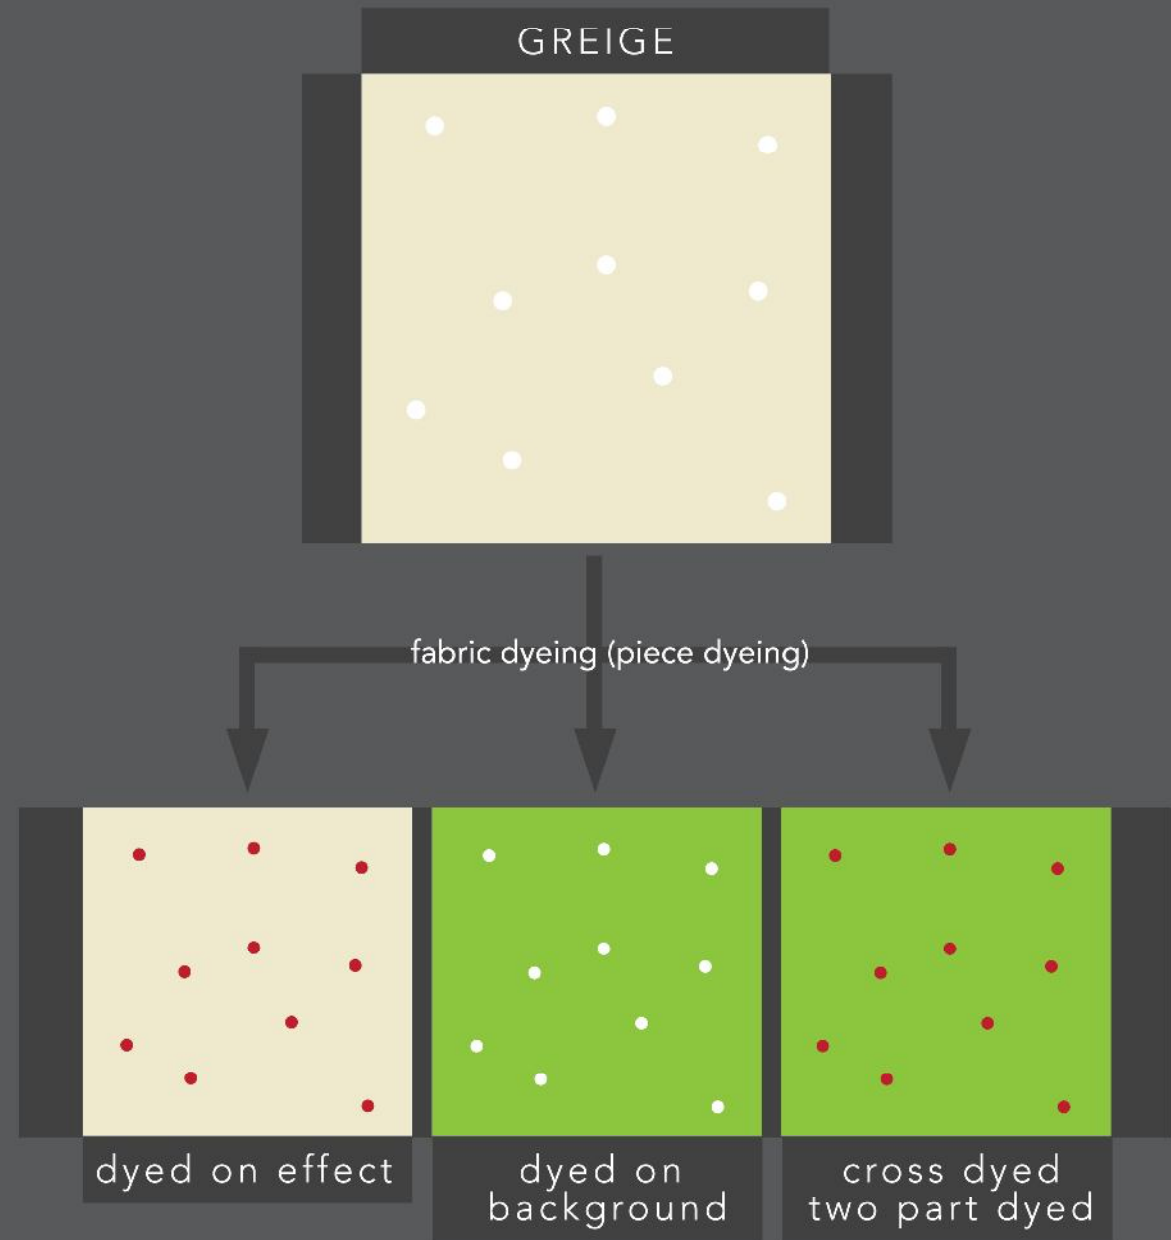

DESCRIPTION

"White background to white effect fancy yarn" is a yarn made from two or three different raw white fibers blending during the spinning process. It has raw white background part and raw white effect part. This yarn can be knitted into raw white fabric (greige fabric) then dyed on either one part of the material or both parts of the material. The fancy effect will appear after dyeing.

BENEFITS

The "White to white fancy yarn" has similar benefits as "conventional raw white yarn" such as,

- Full flexibility in color selection.
- Quick to react to changing in color trend
- Reducing fabric production leadtime for special color selection
- Easy to manage yarn variety in inventory
- Less dyed yarn leftover
- No need for expensive dyed yarn

WHITE TO WHITE FANCY YARN

Raw white effect on raw white background.
Good for fabric dyeing.

SPACE X 001 | reactive purple 100% rayon

SPACE X 001 | reactive red 100% rayon

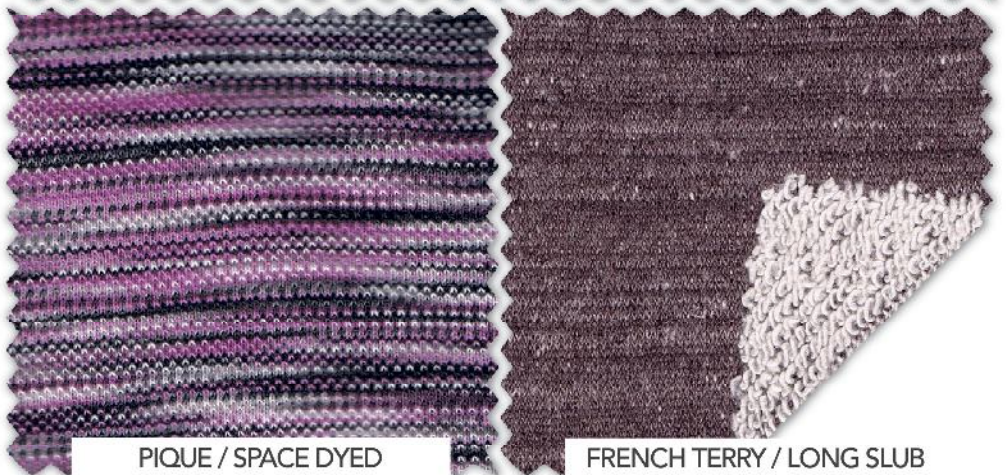

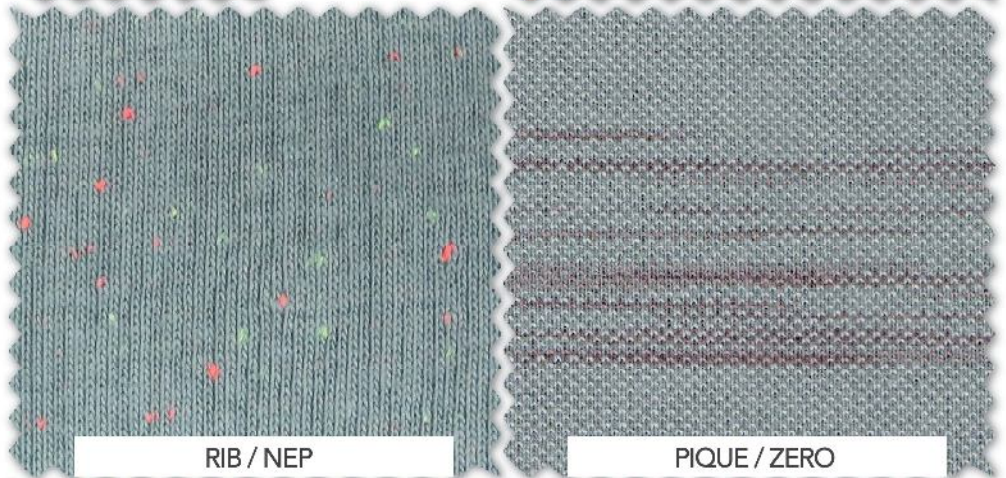

APPLICATION CIRCULAR KNITTING

DESCRIPTION

Most of Kongkiat fancy are being used in circular knitting market. Customers can knit in many different patterns from basic jersey, French terry, Pique, Lacoste, Rib, Interlock, Double face, Jacquard, etc.

Each patterns has its own unique look but the common technique that can be applied to reduce cost and create more variety are Feeder by feeder knitting technique and Colored stripe technique

<< more effect more cost

less effect less cost >>

FEEDER BY FEEDER KNITTING TECHNIQUE

Knitter can reduce cost of fabric by "Feeder by feeder" knitting technique. Kongkiat recommends knitting one "White to White fancy yarn" with one or two or three conventional raw white yarn in order to lower the cost of the whole fabric. Customers still get the unique fancy effect but maintain the cost level that they need.

* all stripe fabrics are made by fabric dyeing (piece dyeing)

COLORED STRIPE FABRIC

With "White to white fancy yarn", customers can create a stripe fancy effect fabric by knitting different types of yarn and material in stripe form. Then piece dyeing the fabric with suitable dyestuff. The end result is the stripe fabric that look like it was made from color dyed yarn with cheaper costing.

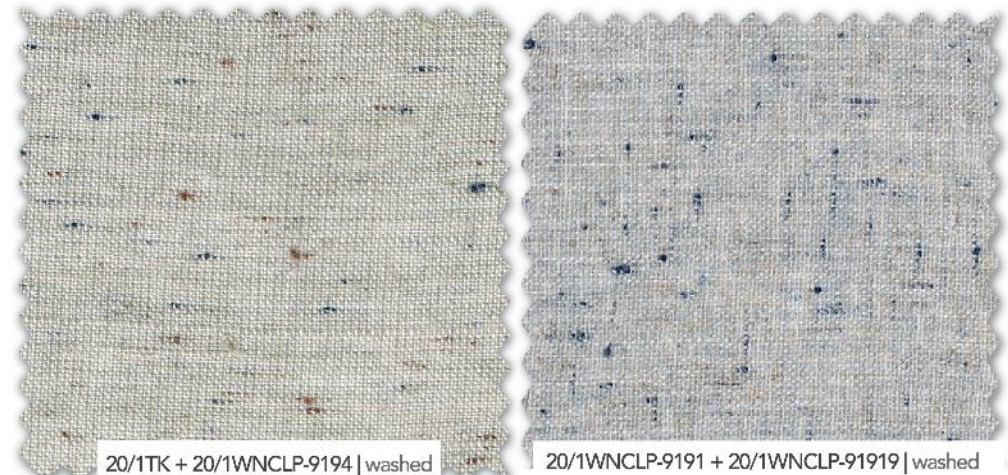

APPLICATION WEAVING

DESCRIPTION

For many years, Kongkiat pays attention on R&D and marketing our fancy yarn on knitting market. It has been a great success for us and we want to expand our know-how into weaving fabric market.

- Offer wide range of yarn count from Ne 8 to 30
- Tailor made blending ratio. Kongkiat can blend cotton, polyester, rayon, acrylic, nylon, linen, wool, bamboo, silk noil, silk, and other fancy effect
- Provide full range of woven sample swatches, dyeing instruction to guide our customers to create their own fancy woven fabric

note : yarn A x yarn B = warp x weft

Combination of woven samples from Kongkiat's fancy yarn
